## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9-12 of U.S. Patent No. 6,611,118. Although the conflicting claims are not identical, they are not patentably distinct from each other because "said non-reverse input terminal is connected via a third resistor and a first capacitor which are arranged in parallel to a reference voltage" recited in claim 1 carries the same meaning as "a third resistor and a first capacitor are connected in parallel to a reference voltage" as recited in claim 9; "said non-reverse input terminal is connected via a seventh resistor to a reference voltage" of claim 1 carries the same meaning as "a seventh resistor is connected to a reference voltage" of claim 9; and "a twelfth resistor" of claim 1 and "an eighth resistor" of claim 9 are not patentable distinct other than one resistor is named "twelfth" and the other one resistor is named "eighth" of patent number '118. Claims 3 and 4 are given with the same interpretation as set forth in claims 1 and 2 rejection.

### *Citation of Pertinent References*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Yokoyama et al. '676 discloses a magnetic head position controller comprising a first (O), a second (400, 411, 412), and a third (406) operation amplifiers as shown

in figures 3, 14, 17, 20, 27, 29, 32, 42, 46, and 80 except one of the input of the second amplifier is connected to the output of the third operation amplifier.

The patents to Merello et al. '214 and Kokami et al. 2002/0071199 disclose actuator drivers for disk drives comprising comparators for current feedback detection.
